Re : Hydroxy system

To Whom It May Concern:

We installed a RTR hydroxy system on our truck and the testing thus far over the last couple of months has resulted in approximate 29% fuel saving on the Hino 15-207 8 litre turbo diesel truck we have increased our kilometres per litre from 2.7 to 3.5. This particular Hino 15-207 truck has no rev or speed governors activated I believe the results will improve even more if we govern the vehicle. Feel free to contact the undersigned.
